MEMORANDUM

July 6, 2009

TO: Long-Term Fiscal Stability Commission

FROM: Ron Kirk, Economics Section, 303-866-3521

SUBJECT: How Colorado Compares In State and Local Taxes

This memorandum provides an update on how Colorado's state and local taxes compare with that of other states. These rankings provide a national perspective for evaluating the relative tax burden of Colorado's citizens and businesses and for comparing the differences in overall tax structures.

Summary

Colorado's combined state and local taxes of \$98.01 per \$1,000 of personal income were the **fifth lowest** in the nation in FY 2005-06. Colorado's tax structure has had a long tradition of having a strong, decentralized local government tax system that has resulted in state taxes that continue to rank among the lowest in the country while local government taxes rank among the highest. As an example, when looking at state taxes, Colorado had the **third** lowest state tax collections (\$48.25 per \$1,000 of personal income) for FY 2007-08 in the country. In comparison, Colorado had the **twelfth** highest local government taxes in the nation at \$49.51 per \$1,000 of income in FY 2005-06. These rankings have remained fairly stable over the last decade.

Measures Used for Ranking Taxes

The rankings for taxes in this memorandum are **based on tax collections per \$1,000 of personal income**. However, for comparison purposes, some of the state and local tax rankings are also shown using a per capita measure. Rankings based upon the measure of tax collections per \$1,000 of personal income are used because it provides a better measure of the ability of taxpayers to pay than per capita tax collections.

For example, if in city A taxes were twice as much as in city B, but everyone earned twice as much in city A, the per \$1,000 tax measure would be equal in both cities. The per capita measure would show taxes as being twice as high in city A. For most of Colorado's state and local taxes, the per capita measure results in a higher tax ranking or burden when compared to other states.

State rankings are for FY 2007-08, while the local and combined tax rankings are for FY 2005-06, as this is the most recent year for which local tax data are available. (Local and combined tax ranking data for FY 2006-07 will become available in late July 2009.) This research concludes with a set of tables that provides a state-by-state comparison for tax rankings in the United States using both tax collections per \$1,000 of personal income and per capita measures as follows:

- Appendix A — Combined State and Local Tax Rankings (FY 2005-06);
- Appendix B — State Tax Rankings (FY 2007-08); and
- Appendix C — Local Government Tax Rankings (FY 2005-06).

Combined State and Local Government Tax Burden

Colorado's combined state and local taxes were the **fifth** lowest in the nation — \$98.01 per \$1,000 of income, which was 15.7 percent below the national average of \$116.22, in FY 2005-06. Combined state and local property taxes were the 32nd highest at \$29.98 per \$1,000 of personal income. Despite the fact that Wyoming does not have an income tax, taxpayers in the state have the highest tax burden in the country due to its relatively high severance, property, and sales taxes. In contrast, South Dakota has the lowest tax burden.

Table 1 shows how combined state and local government taxes in Colorado compare to other states. Table 2 displays the same comparisons using the per capita measure. Table 3 provides a comparison for combined state and local property taxes and Table 4 provides a comparison for combined state and local sales taxes. For combined state and local government taxes, Colorado is ranked fifth lowest using the per \$1,000 measure and 24th lowest when using the per capita measure. For combined property taxes, Colorado is ranked 32nd highest using the per \$1,000 measure and 23th highest using the per capita measure. Appendix A provides a state-by-state comparison for combined state and local tax rankings using both measures.

Table 1: How Combined State and Local Government Taxes In Colorado Compare

Colorado	17	\$1,027.17
U.S. Average	n/a	\$953.64

State Tax Burden

Colorado has had a long tradition of having a strong, decentralized local government tax system that has resulted in state taxes that rank among the lowest in the country, while local government taxes rank among the highest.

Colorado has a low state tax burden. Colorado had the third lowest state tax collections (\$48.25) per \$1,000 of personal income for FY 2007-08 in the country. In terms of a state-to-state comparison, the state tax burden was nearly the same (the state ranked 47th) ten years ago in FY 1997-98, although collections were higher at \$54.68 per \$1,000 of income.

Graph 1 shows the ten-year trend for Colorado and U.S. tax collections. As the state's economy grew in the early 1990s and capital gains income increased more than sevenfold, tax collections or tax burden rose gradually until it reached a peak in FY 1998-99. The tax reductions passed by the General Assembly, the recession, and declining capital gains greatly reduced this trend over the next four years until it reversed after FY 2002-03. After FY 2002-03, the increase in tax collections was likely attributed to larger state income tax collections from capital gains.

Graph 1: History of State and U.S. Tax Collections Per \$1,000 of Income

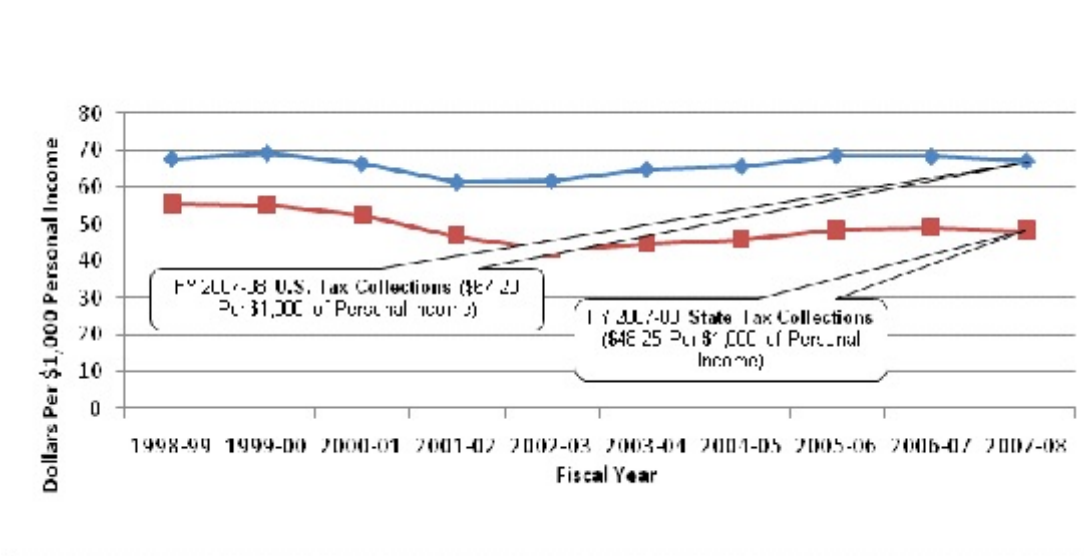

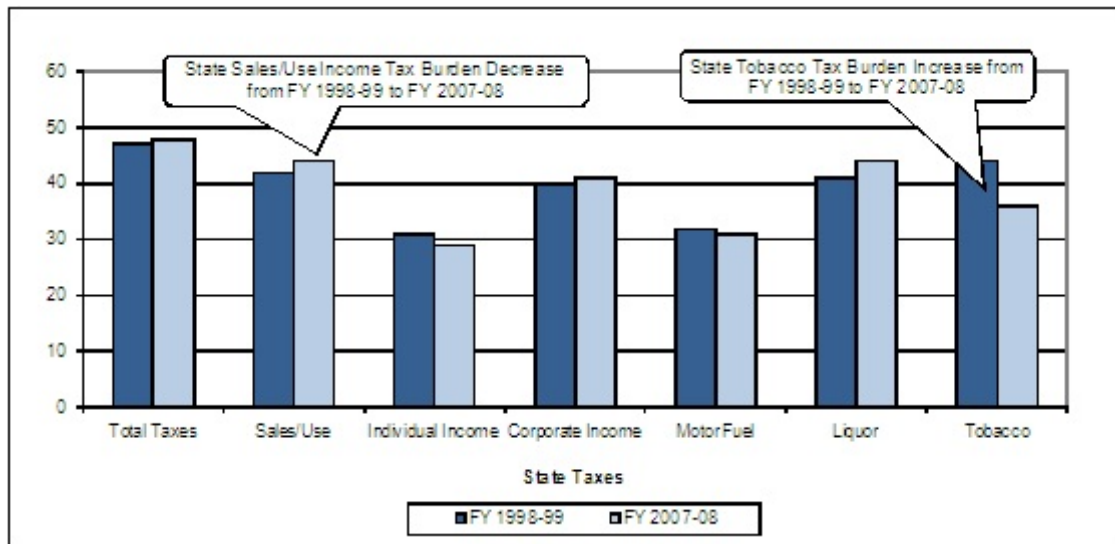

Table 5 shows how selected state taxes in Colorado compare to other states. For state sales/use taxes, Colorado ranked 44th, or seventh-lowest. Colorado ranked 29th highest for individual income taxes, which is slightly below the median in terms of state income tax burden.

Table 5: How Selected State Taxes In Colorado Compare
(per \$1,000 income, FY 2007-08)

State Taxes	Colorado		National	
	Rank	Tax	High	Low
Total Taxes	48	\$48.25	\$308.91	\$41.20
Sales/Use	44	\$11.59	\$52.26	\$0.00
Individual Income	29	\$25.41	\$40.59	\$0.00
Corporate Income	41	\$2.55	\$35.99	\$0.00
Motor Fuel	31	\$3.19	\$7.60	\$0.59
Liquor	44	\$0.18	\$1.43	\$0.07
Tobacco	36	\$1.11	\$3.63	\$0.23
Severance	15	\$0.76	\$254.43	\$0.00

Graph 2 shows a historical comparison of select Colorado taxes compared to other states in terms of tax rankings in FY 1998-99 and in FY 2007-08. When looking at total state taxes, the tax burden, or ranking, in FY 1998-99 was nearly the same as in FY 2007-08. Colorado ranked fourth lowest (rank 47th) 10 years ago and now ranks third lowest (rank 48th). The bar chart in Graph 2 shows that over this time-period, the tax burden in terms of rankings increased for individual, motor fuel, and tobacco taxes while tax burden decreased for total taxes, sales and use, corporate, and liquor taxes.

Graph 2: Colorado State Tax Ranking in FY 1998-99 and FY 2007-08 (per \$1,000 income)
Rank of 50 = Lowest Tax Burden

Local Tax Burden

While state taxes rank as some of the lowest in the U.S., Colorado's decentralized local government tax structure has resulted in local government taxes that rank among the highest.

Colorado has a high local government tax burden. Colorado's local tax burden in FY 2005-06 ranked **twelfth** highest in the nation at \$49.51 per \$1,000 of personal income. The local tax burden was nearly the same at \$48.09 per \$1,000 of income (tenth highest) in FY 1996-97. Despite the fact that the ten-year snapshot for local tax burden is nearly identical, in FY 1999-00, Colorado's local tax collections ranked 7th highest in the nation.

For FY 2005-06, local taxes accounted for 50.5 percent of combined state and local taxes in Colorado, the fourth highest ratio in the country. The U.S. national average ratio was 40.5 percent. New Hampshire had the highest ratio at 53.9 percent while Vermont's ratio was the lowest at 12.6 percent. In contrast to the local tax ratio, Colorado's state taxes made up 49.5 percent of combined state and local taxes, the fourth-lowest ratio in the country. The U.S. national average ratio for the state component was 59.5 percent. Table 6 shows the relationship between local and state taxes in Colorado and selected states.

Table 6: Relationship Between State and Local Taxes by State (FY 2005-06)

	Local Taxes as Percent of Total Taxes	Rankings	State Taxes as Percent of Total Taxes	Rankings
United States	40.5%		59.5%	
Arizona	40.4%	18	59.6%	33

Montana	29.6%	41	70.4%	10
Nebraska	42.4%	14	57.6%	37
Nevada	37.0%	28	63.0%	23
New Mexico	26.7%	43	73.3%	8
New Hampshire	53.9%	1	46.1%	50
Utah	34.1%	32	65.9%	19
Vermont	12.6%	50	87.4%	1
Wyoming	32.3%	34	67.7%	17

Major revenue sources for local governments. Property and sales taxes are the major sources of tax revenue for local governments. While local governments in every state collected property taxes, local governments in 15 states did not collect sales taxes. The high level of fiscal decentralization in Colorado particularly manifests itself in high local sales taxes. This tax burden was the second highest in the country, while local property tax was the 29th highest. Table 7 displays the state's rankings and comparisons for these taxes.

Table 7: How Selected Local Government Taxes In Colorado Compare
(per \$1,000 income, FY 2005-06)

Local Government Taxes	Colorado		National	
	Rank	Tax	High	Low
